

# P-Blocks®

Cellular PVC, Pocketed Mounting Blocks

It's not a J-Block,  
It's a P-Block

## P-Blocks

Introducing P-Blocks—the new and elegant way to trim out accessories on your home, without the inexpensive look of traditional vinyl mounting blocks.

P-blocks are manufactured of high quality cellular PVC, with a 3/4" x 3/4" Pocket to conceal siding ends and seamlessly integrate fixtures into your siding. P-blocks work perfectly with wood, fiber cement, and vinyl siding. The 3/4" pocket replaces the j-trim while your siding ends are perfectly concealed behind the P-block pocket.
